Have your GreenShield ID + OHIP number ready

WHAT'S COVERED

Sudden, **unforeseen** illness or injury while travelling outside Ontario for vacation, education, or business. It tops up OHIP — it doesn't replace it.

- Emergency medical: up to **\$1,000,000** per person / calendar year
- Referral services (pre-authorized): up to **\$75,000** / year
- Hospital, physician & surgical care; land & air ambulance (air must be pre-approved)
- Emergency dental: up to \$2,500 (blow to mouth) / \$500 (pain relief)
- Getting home, bedside visit, meals & lodging if delayed, return of vehicle
- No deductible, no co-pay on travel claims

NOT COVERED

- Trip cancellation / interruption — this is *medical* coverage only
- Planned, elective, cosmetic or experimental care abroad
- Pre-existing conditions **not stable in the 90 days** before departure
- Pregnancy within 8 weeks of due date
- Chronic alcohol/drug use; incidents over 0.08 blood alcohol
- Trips taken *to get* diagnosis or treatment (medical tourism)
- Care tied to a gov't epidemic/pandemic "avoid travel" advisory

THREE RULES THAT PROTECT YOUR CLAIM

- 1 Call first.** Phone Travel Assistance before you're treated, or within 48 hours if it was impossible to call sooner. Miss this and your payout can be cut to just the first 48 hours of costs. Major/invasive procedures (surgery, MRI, cardiac work) must be pre-approved.
- 2 Keep OHIP valid.** The benefit only works while your provincial plan is in effect — don't exceed OHIP's out-of-province time limits.
- 3 Be stable before you go.** Any pre-existing condition must have had no new/changed treatment, symptoms, meds, or pending tests in the 90 days before departure.

Summary prepared from your GreenShield benefit booklet (rev. July 1, 2025) for quick reference while travelling. In a dispute, the full booklet and GreenShield's own determination govern. Not legal or insurance advice.

Central Asia — Trip Notes

Tajikistan · Kyrgyzstan · Uzbekistan — tourism

Re-check advisories
close to departure
travel.gc.ca

Tourism is a covered reason to travel, and all three countries sit at advisory levels that **do not** trigger the plan's advisory-based exclusion. A normal medical emergency should be covered as usual. The zones below are the ones to keep in mind.

COUNTRY	OVERALL ADVISORY	ELEVATED ZONES TO NOTE
Uzbekistan	Normal precautions	Avoid all travel within 5 km of the Afghanistan border.
Kyrgyzstan	High degree of caution	No formal avoid-zones; extra caution near Tajik/Uzbek/China borders.
Tajikistan	High degree of caution	Avoid all travel ≤10 km of Afghan border. Avoid non-essential travel to Gorno-Badakhshan (GBAO / Pamir Highway region).

Watch the Pamirs. Tajikistan's GBAO / Pamir Highway is a popular tourist route but carries an "avoid non-essential travel" advisory. GreenShield reserves the right to limit assistance in areas under such a warning, so coverage there is a gray area. If the Pamirs are on your itinerary, call Travel Assistance *before you leave* and get your coverage confirmed in writing.

IF SOMETHING HAPPENS — DO THIS

- 1 **Call GreenShield Travel Assistance first** (numbers on front), before treatment where at all possible. If you physically can't, call within 48 hours.
- 2 **Give them your GreenShield ID and OHIP numbers** and let them direct you to an approved facility.
- 3 **Get pre-approval** for any surgery, scan, or invasive procedure before it happens.
- 4 **Keep every receipt and record** — itemized bills, prescriptions, the physician's name, and any police/accident report.
- 5 **Don't decline a medically-advised return home** — if they say repatriate and you stay, further care for that condition won't be paid.

BEFORE YOU GO — QUICK CHECKLIST

- Save both phone numbers offline (screenshot + written copy in your bag).
- Photograph your GreenShield card (front and back) and note your OHIP number.
- Confirm any ongoing medications/conditions were stable for the prior 90 days.
- If visiting the Pamirs / GBAO, pre-clear coverage with Travel Assistance in writing.
- Re-check travel.gc.ca advisories a few days before departure — levels change.

Advisory levels current as of July 30, 2026, from the Government of Canada (travel.gc.ca). Verify before departure. Coverage details summarized from your GreenShield booklet; GreenShield's determination governs actual claims.
